the flexible rising main

GEOHERMAL OPEN LOOP & RECHARGE PUMPING SYSTEMS FROM PROQUIP DIRECT

Proquip are ideally placed in the market to service the requirements of open-loop geothermal abstraction and recharge systems, being specialist suppliers of borehole pumping equipment to suit all applications. We can provide the whole pumping plant from the abstraction wells to the recharge wells including borehole pumps, motors, wellheads in stainless steel or coated mild steel, stainless diffusers, flowmeters, control panels with BMS interfaces etc.

We are sole agents for E-Tech stainless steel borehole pumps and Boreline flexible rising main but can also supply, install and commission other types of pump & riser where required.

Our custom built borehole pump panels incorporate inverter speed controls fully integrated with all necessary sensors, instrumentation, displays with links to Building Management Systems to provide a complete package tailored to the characteristics of the each individual site. The use of cutting edge technology such as Danfoss Aquadrive inverters, Krohne Optimax mag-flowmeters and integrated borehole pressure / temperature monitoring results in a highly efficient operation.

During our 10 years of supplying borehole pumps we have come across many difficult applications - some at high temperatures, others very deep, highly corrosive waters, etc. Our pumps and products have always seen us through so we can pass this experience on to you. We are confident that with our knowledge and proven products we can offer a cost effective solution to your pumping applications.

For all your Geothermal Pumping needs give us a call for excellent service and dedication.

Krohne Optimax Flow Meters

Stainless Steel Wellheads

VLT Aquadrive Controllers

E-Tech Borehole Pumps
