

Where a borehole pump is installed in an open well, tank, oversized bore or other large body of water it is often necessary to fit a cooling shroud to the motor in order to maintain an adequate flow rate over the surface – as determined by the motor manufacturer.

Proquip Direct Ltd. can supply a simple self-assembly shroud kit for 4" borehole pumps and offer a bespoke manufacturing service for larger sizes.

PVC MOTOR SHROUD KIT FOR 4" BOREHOLE PUMPS

Kit contents :

- Flange for pump end
- Flange for motor end
- 125mm o/d PVC pipe
- 6 self tapping screws

Equipment Required :

- Hand drill
- Screwdriver
- Hacksaw

MOTOR SHROUDS FOR LARGER BOREHOLE PUMPS

For larger pumps Proquip can design and manufacture shrouds in mild steel, stainless steel or PVC to suit any application

Photograph shows a typical 6" shroud in stainless steel
